WINTER IN STEAMBOAT

SNOW REMOVAL INFORMATION

steamboatsprings.net

Welcome to Winter!

In this mountain town, the snow falls in feet, not inches; and winter typically runs from November to April, sometimes a bit longer. In fact, Steamboat Springs' snow is abundant and so unique that it carries its own trademark.

The City of Steamboat Springs is a thriving resort community with a great demand on its transportation system. Winter maintenance is a vital function; and as you can imagine, is handled a bit differently when you sit at 6,700 feet/2,042 meters above sea level.

The Public Works staff takes great pride in providing street maintenance and is dedicated to maintaining 80 miles of streets, 6 miles of alleys, 37 parking lots, 1,100 fire hydrants and 105 cul-de-sacs. The 5 miles of US Highway 40 through downtown is the responsibility of the Colorado Department of Transportation.

We hope the information in this handout is helpful in making the most out of winter. Please feel free to contact our office at any time if you have questions or concerns.

Have a safe and enjoyable winter.

Jon Synder
Public Works Director

David Van Winkle
Street Superintendent

PRIORITIES

The city utilizes grader snow plowing complemented by sand truck plowing. This method allows for improved widening of the roadways, the removal of snow pack on the streets, and a reduction in windrows (berms) per storm.

1 The first priority is to keep roadways clear of snow for emergency access and traffic flow.

2 During times of heavy snowfall, streets are prioritized according to public safety requirements and traffic volumes, with a focus on access routes for emergency vehicles, bus and commercial routes, and then residential areas.

3 When the snow stops, crews work to remove snow from storage piles throughout the community.

BE A GOOD NEIGHBOR

Homeowners and residents are responsible for maintaining their own driveways and parking areas. Your snow must be disposed of on your own property. Disposing of snow in roadways will only affect your neighbor.

Streets - Snow removal crews sometimes work long hours and holidays to keep the streets safe. We ask for everyone's cooperation to help keep them safe as well. Remember, plow trucks cannot stop or turn as readily as most vehicles. Please allow ample space for city snowplows to maneuver freely.

Driveways - When plowing is required, snow windrows are created across driveways. Removal of this snow in driveways is the responsibility of the property owner. The city tries to keep this occurrence to a minimum. We ask the residents to be patient and recognize that during the winter months there will be some inconvenience. Snow operations are labor intensive and equipment does fail on occasion.

Private Snow Plowing - Property owners should be aware that the placing, dumping or pushing of snow onto city streets or right-of-ways from adjacent properties is prohibited.

STREETS

BLUE street signs signify city maintained streets, **BROWN** street signs indicate privately maintained streets. Please note that pushing or throwing snow onto or across a roadway when clearing your driveway is unlawful.
