

Detours In Effect Tomorrow For Barn Relocation

Historic Arnold Barn Completes First Phase of Move to New Home

STEAMBOAT SPRINGS, COLORADO-October 17, 2018-After nearly 90 years in its original location, the historic Arnold Barn is one step closer to its new home after it completed the first phase of the relocation, moving into the Meadows parking lot this afternoon.

After today's successful move, Bailey House Movers has the barn positioned for the second leg of the journey ready to begin in the late morning tomorrow, Thursday, October 18. Between 11AM to 11:30 AM, Community Service Officers (CSO) and city crews will put the finishing touches on the detours and reroutes, which will go into place around 11:30AM.

The barn is expected to be on the road shortly after 11:30AM if all goes as scheduled. The entire process on Thursday is expected to take several hours and crews anticipate having the barn placed in its new location between 1:30pm to 3pm, with detours reopening immediately after settling into its new home.

While the barn is traveling on the uphill side of Mt. Werner Drive, traffic headed to the ski mountain will share the north side lanes with downhill traffic; then continuing around Mt. Werner Circle as part of current traffic pattern. Uphill traffic will not be permitted to turn left toward the Steamboat Grand during this time.

Detour Timeline

11-11:30AM	Final Traffic Set-Up
11:30AM	Detours implemented
11:30-12PM	Barn enters uphill lanes of Mt. Werner Rd.
1:30-3PM	Barn arrives at site
Immediately After	All routes restored.

Vehicles leaving the ski area and Ski Time Square will travel down the south portion of Mt. Werner Circle; then be detoured onto Eaglesridge Drive to Walton Creek Road.

Travelers should keep in mind that Village Drive is closed due to the installation of a new culvert.

Once the barn makes the turn from Mt. Werner Road to the north side of Mt. Werner Circle, a complete traffic hold will occur on that portion of the road up to Burgess Creek Road so the barn can be backed into the site location. During the 20 to 30 minute hold, all traffic will use the south portion of Mt. Werner Circle and vehicles from Burgess Creek will be directed through the roundabout under construction.

For those wishing to watch the transition to its new location, it is suggested to park in the Meadows Lot and view the process from the sidewalk/bike path on the south side of Mt. Werner Drive. Spectators may also use the outer portion of Mt. Werner Circle across from the new site. Please stay off the road at all times.

This project is made possible by strong community partnerships and grassroots efforts and is funded by the Steamboat Springs Redevelopment Authority and generous contributions from community members.
