

River Road Interceptor Project Moves into Howelsen Parkway *One-Lane Traffic, Detours and Closures Expand*

STEAMBOAT SPRINGS, COLORADO-September 5, 2019-The 2019 River Road Interceptor Project is in full swing and installation is moving out of the Howelsen Parking lot into Howelsen Parkway.

Lane closures and detours will be in effect beginning this week and continuing for the duration of the project. Access to Howelsen Lodge, the parking lot and pump track will be reduced to one-way traffic for the next week.

On Monday, September 9, traffic is expected to have one-way access north to Howelsen Lodge, parking lot and pump track along Howelsen Parkway. Traffic will be routed south from the lodge and parking area through the rodeo grounds to 5th Street. Traffic patterns will return to normal during weekends.

The \$1.68M project will include the installation of a larger sanitary sewer main to replace an aged and undersized system, a sidewalk to connect 5th Street to Agate Street, two separate fiber optic conduit systems and a stormwater system.
