

Utility Projects Impact Riverside & Stehley Park

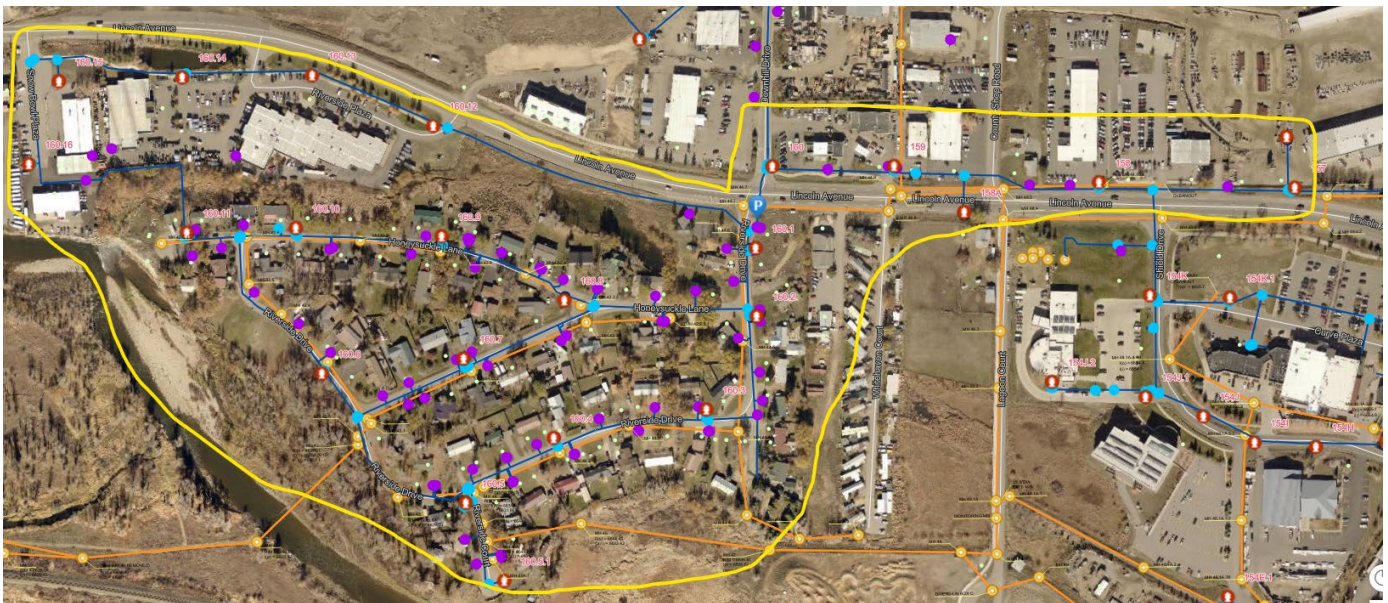

Riverside Water Outage Set for Thursday, July 6 between 9AM to 3PM

STEAMBOAT SPRINGS, COLORADO-July 1, 2023-The city will be performing two utility projects that will impact two areas of the city this week, specifically Riverside and Stehley Park-East Logan Avenue.

The city will be changing over the sanitary sewer services of the homes along East Logan Avenue from an old clay tile sanitary sewer main to a newer PVC sanitary sewer main. The project, which starts on Wednesday, July 5, is anticipated to take approximately two weeks to complete.

During the transition, the pedestrian path running along the north side of Stehley Park will be closed for the duration of the project. Pedestrians are asked to leash pets, use caution, and take the southern gravel trail through the park to access Butcherknife. Crews will be working from 7am to 7pm.

The second project is scheduled repairs and maintenance to the water main in the Riverside area, which requires a complete water shut off on Thursday, July 6. The planned six-hour outage will occur starting at 9am and should not run past 3pm. The work will impact approximately 90 service connections across businesses and residential units (see below).

If you have questions or need addition information please contact Amber Gregory for the Stehley Park project and Brian Morse for the Riverside project.
